USV Methodological Notes - Dataset degree programs 2025-2026

Dataset Name:
USV - DEGREE PROGRAMS 2025-2026

Dataset Description:
This dataset contains information on active degree programs at the "Ștefan cel Mare" University from Suceava for the academic year 2025-2026. It includes details on the number of enrolled students, categorized by gender and age, along with information on each program, the affiliated department, EQF (European Qualifications Framework), ISCED (International Standard Classification of Education), national classification and geographic coordinates.

Authors:
WP8 "Ștefan cel Mare" University from Suceava (USV) Team.

Reasons for this dataset:
The USV - DEGREE PROGRAMS 2025-2026 aims to provide a comprehensive overview of active degree programs, highlighting enrollment statistics by gender and age. This information helps educational institutions and policymakers understand enrollment trends, identify gaps, and allocate resources more effectively. Also, by categorizing students by gender and age, the dataset can reveal important insights into demographic trends and can help address issues of gender disparity and ensure that programs are accessible to all age groups. By understanding the diversity of the student body, the educational planning and policy making structure can better tailor its resources and support systems to enhance educational outcomes, promote inclusivity and provide improvements in curriculum design and teaching methods.

Validity and traceability of information, sources, websites:
The dataset has been compiled from official sources affiliated with "Ștefan cel Mare" University from Suceava, specifically the university's Tuition Management Application and its official website https://usv.ro. Data pertaining to undergraduate and master's programs was extracted from the Tuition Management platform, while doctoral-level statistics were obtained from IOSUD. The use of these institutional sources ensures the data's validity, reliability, and traceability, reflecting a comprehensive and authoritative overview.

Dataset limitations
/

Number of rows:
111 rows

Number of columns:
21 columns

Columns:
