

Methodological Notes

Dataset Name:

University of Nicosia (UNIC) Degrees & Enrollments 2023-2024 Dataset

Dataset Description:

This is a dataset that provides detailed information about the Educational Programmes offered by the University of Nicosia, including data about the respective faculties, course of study, national classification, study type, EQF level, ISCED level, gender of enrolled students per course of study, geographical information as well as the average age of students enrolled per course of study.

Authors:

The University of Nicosia

Reasons for this dataset:

This dataset aims to provide a comprehensive overview of all courses of study and types of Diplomas offered by the University of Nicosia, as well as the format of the studies (on-campus, online). Furthermore, it gives a detailed overview of the numbers of students enrolled for the offered courses, for the period 2023-2024.

Validity and traceability of information, sources, websites:

The information was sourced from the Enrollment Office of the University.

Dataset limitations

Unfortunately we were not able to provide detailed age classification of the students enrolled; we were only able to provide average age of students per course.

Number of rows:

There are 134 rows in the dataset.

Number of columns:

There are 19 columns in the dataset.

Columns:

Column 1 is the University Acronym

Column 2 is the actual name of the University in the national language (Greek)

Column 3 is the name of the University in English

Column 4 is the name of the Faculty of Degree Programme in Greek

Column 5 is the name of the Faculty of Degree programme in English

Column 6 is the name of the Course of Study in Greek

Column 7 is the name of the Course of Study in English

Column 8 is the level of national classification of the course of study in Greek

Column 9 is the level of national classification of the course of study in English

Column 10 is the course of study type in Greek

Column 11 is the course of study type in English

Column 12 represents the level of European Qualification framework

Column 13 represents the level of ISCED Classification

Column 14 provides the number of students per course that declined to provide their gender

Column 15 provides the number of female students enrolled in the course

Column 16 provides the number of male students enrolled in the course

Column 17 provide the total number of students enrolled in the course for the period 2023-2024

Column 18 provides the geo-location of where in the campus the course takes place

Column 19 provides the average age of enrolled students in the course, for the period 2023-2024.
