Methodological Notes

Dataset Name:
Örebro University timeline dataset

Dataset Description:
This dataset contains a historical timeline highlighting important events in Örebro university's history. The document includes years, names of the events, and a very short descriptions of them. It also contains images with information about authors and licenses for use and links to webpages related to the events. Additionally, geographic coordinates are included where applicable. There is also a column titled "Date" for year, month, and day, but we have chosen to leave it empty.

Authors:
Mattias Persson, Örebro University

Reasons for this dataset:
The dataset covers important events in the history of Örebro University, providing an understanding of the significant development it has undergone from the 1960s to today. It not only highlights the university but also the broader society of which the university is a part. It is a simple compilation that is easy for both students and faculty to access.

Validity and traceability of information, sources, websites:
Note. Needs to be completed.

Webbsite:
https://www.oru.se/english/about-us/facts-about-orebro-university/

All images come from Örebro university's internal image database, which is accessible only to staff.

Dataset limitations
We do not have as many images as we would have liked because it was difficult to find ones we could publish due to copyright reasons. Additionally, there were no images available for events further back in time.

Number of rows:
52

Number of columns:
9

Columns:

Description of the column content, one by one, with the information about the number of the column, its title and its description.

A - Date: Year, month and day when the event took place.
B - Year: This is the year the event took place.
C - Event Name: Title or summary of the event
D - Brief event description: More information about the event than what is in column C.
E - Image: Images related to the event.
F - Image author/Creator: Name of copyright holder and/or author/creator of the image.
G - Image license: Type of license for the use of the image.
H - Geographic coordinates: Coordinates for the location where the event took place.
I - URL: Links to webpages related to the event.
