Unisa Distributed Museum Methodological Note

Dataset Name:
Unisa Distributed Museum

Dataset Description:
This dataset contains detailed information about the artworks present at the University of Salerno (UNISA). It includes data on each artwork's name, author, type, year of creation, description, images, geographical coordinates, and relevant URLs for further exploration.

Authors:
WP8 Unisa Team

Reasons for this dataset:
The dataset aims to preserve and promote awareness of the artistic heritage at UNISA. It serves educational and research purposes, allowing students, scholars, and the public to engage with and explore the university's art collection.

Validity and traceability of information, sources, websites:
The information is sourced from the UNISA archives, catalogues and website.

Dataset limitations
/
